REPORT

OF THE

Superintendent of Schools

OF THE

TOWN OF HAMPDEN

1919

Report of the Superintendent of Schools

To the School Committee of Hampden:

Gentlemen:—The chief matter which I wish in this report to bring, through your board, to the attention of the citizens of Hampden, is the General School Fund law, so called, enacted by the last legislature, and its possible effect on the schools of the Town.

This law is divided into Part I and Part II.

By the provisions of Part I, approximately \$4,000,000 is to be taken annually from the proceeds of the State income tax for distribution among all the cities and towns of the Commonwealth as reimbursement for salaries paid public school teachers. The amount of reimbursement is \$100 for each teacher paid at least \$650 per year, \$150 for each teacher paid at least \$750 per year and having certain minimum professional qualifications, and \$200 per year for each teacher having the maximum professional qualifications which the law recognizes and receiving a salary of at least \$850 per year. The immediate effect of these provisions has been to increase teachers' salaries throughout the State, and to sharpen the demand for qualified teachers who can bring back the maximum reimbursement. As Hampden has three teachers on whose salaries a reimbursement of \$150, and two on whose salaries a reimbursement of \$100 will be received, there will be due it from the State on

the fifteenth of next November \$650 as reimbursement on teachers' salaries.

Part I also provides for supplementary reimbursements for towns of low valuation. In the case of Hampden this will amount to \$50 per teacher, or a total of \$250. The Town will thus receive in 1920 a total of \$900 as reimbursement on teachers' salaries.

Part II of the law provides for the distribution of the income of the Massachusetts School Fund among the towns of low valuation, this distribution to be made on March tenth of each year. The manner of the distribution is difficult to explain briefly, and the amount to be received by the Town of Hampden on the tenth of next March will depend somewhat on the school expenditures for the year ending December 31, 1919. As a statement of these expenditures is not available at the time of writing this report, I cannot give the exact amount that will be received.

Briefly, in this part of the law the State attempts to provide that each town shall have, without a burdensome local tax, an assured minimum of \$1100 for every school which it maintains, \$850 for teacher's salary, and \$250 to defray the expense of operation and of various other items in connection with the support of the school. In the case of the Town of Hampden, it amounts to this: The Town may expend money up to \$850 per school for a teacher and up to \$250 per school for fuel, janitor, textbooks, supplies, etc., and the total amount so expended in excess of the proceeds of a five-dollar tax will come back to the Town from the Treasurer of the Commonwealth.

I have heard much discussion on the problem of High School transportation. It requires no argument to prove that a rate of payment for transportation established six or more years ago may be very inadequate now. It seems to me that inasmuch

as the burden for school support is being transferred so largely to the State treasury, the Town may well raise and appropriate money in excess of \$1.50 per pupil per week for this purpose.

The question arises as to how the amounts to be received from the State on March 10th and November 15th of each year should affect the budget proposals which the Committee submit annually to the Town. The Commissioner of Education has called attention to the fact that the amounts received are not specifically set aside for schools. Accordingly, he recommends "that school authorities request the Town to appropriate a sufficient amount to run the school for the entire year, and at the same time furnish a statement showing the amounts which the Town may expect to receive as reimbursement on account of existing laws relating to education. These amounts will be used by Assessors in fixing the tax rate, so that the actual amount required to be raised by local taxation for school purposes will be the difference between the amount requested and the estimated receipts."

The customary tables of statistics follow. While the enrolment at the Scantic school last year was small, the record of the school is remarkable in that there was not a case of tardiness during the whole year.

I wish to add a word in commendation of the teachers of the Town. It would be difficult to find a body of teachers more earnestly devoted to their work than are those of Hampden. It seems to me, also, that they are securing very creditable results.

Respectfully submitted,

FREDERIC A. WHEELER,

Superintendent of Schools.
