

Scantic Valley Water District
April 13, 2021
12:00pm

Meeting Minutes

Members present: Craig Rivest (Chair), John Plaster (Commissioner), Bob Flagg (East National Water), Mason Flag (East National Water)

Meeting called to order at 12pm by Chair

Bills reviewed and accepted for for payment;

- National Grid \$168.97
- East National Water invoice #7952 \$665.00

Discussion Items;

- Discussion on Main St Drinking water issue. On February 10, 2021, the SVWD board proposed to the Hampden Board of Selectmen a viable option of extending the current water district to include the affected properties of salt contamination. The BOS approved a study with consultant Tighe & Bond for best possible solution. Concerns were brought up about any water storage holding tanks either at DPW or Fire Dept. Water restrictors would be required to slow the fill rate so not to exceed the daily usage of 14,700 gallons per day of the SVWD wells.
- Bob Flag said the battery back up for the pump house generator should be looked at. Bob also mentioned that the generator could use servicing and the exterior of the pump house needs some attention. Bob also suggested the possibility for VFD (variable frequency drive) to help eliminate energy consumption spikes when the well pumps turn on.

Meeting adjourned at 1:00pm

Next meeting May 11th, at 10:00am
